

ARTSIOM RABETS

Senior UX/UI & Product Designer · Warsaw, Poland

UX/UI Designer with 7+ years across B2B SaaS, enterprise tools, mobile apps and marketplaces. I translate complex requirements and user needs into clear, scalable design solutions. My main strengths are usability testing, rapid prototyping, cross-functional collaboration and design systems,

AI is a core part of how I work now: Claude for research synthesis, problem framing and UX copy; Figma Make for rapid prototyping. Not occasional experiments, but my standard workflow.

SKILLS & TOOLS

Design Expertise

- User-Centered Design (UCD)
- Design Thinking
- Interaction Design (IxD)
- Wireframing & Prototyping
- Information Architecture (IA)
- Responsive & Mobile Design
- Accessibility & Inclusive Design (WCAG)
- Visual Design & Layout Systems
- Design Systems & Component Libraries
- Microinteractions
- Strategic Thinking & Business Alignment

Research & Strategy

- User Research (Quantitative & Qualitative)
- Personas & Empathy Mapping
- Customer Journey Mapping (CJM)
- Usability Testing & Heuristic Evaluation
- UX Audits & Competitive Analysis
- Stakeholder Interviews & Discovery
- User Stories & JTBD Framework
- Data-Driven Design (Hotjar, GA)
- Value Proposition
- User Retention Strategies
- OKRs & KPIs

Tools & Collaboration

- Figma / Miro / FigJam / Notion
- Claude / Figma Make / Replit
- Jira / Confluence
- Workshop Facilitation & Co-Creation
- Agile & Scrum Methodologies
- Product Discovery & Roadmaps
- User Flows & Task Flows
- A/B Testing
- Cross-Functional Collaboration
- Mentoring & Team Support
- Time Management & Prioritization

WORK EXPERIENCE

Senior UX/UI Designer

Godel Technologies (2022 – Present)
Warsaw, Poland

Led end-to-end UX/UI initiatives across B2B SaaS and internal tools, improving user experiences through research-driven design, strategic collaboration and system thinking. Worked cross-functionally with product managers, engineers and stakeholders to elevate product quality and user satisfaction.

- **Transformed ESG Reporting Tool** by embedding design into early discovery, redefining team workflows, introducing UX metrics and user feedback loops, contributing to improved stakeholder alignment across 3 product teams.
- **Conducted foundational user research** for a Staffing Portal, identifying key usability gaps and championing recommendations that shifted user behaviour back to the internal system from external workarounds.
- **Redesigned a VoIP platform** by improving navigation, notifications and call handling. Post-launch results included a 13% drop in missed calls rate, a 50% improvement in call transfer speed and a 28-point NPS increase.
- Built and maintained **modular design systems** in Figma, enabling consistency across platforms and streamlining collaboration between designers and developers.
- Advocated for **data-informed prioritization**, introducing rituals and estimation sessions that stabilized delivery and improved cross-team decision-making.

UX/UI Designer

SIA Truck 1 (2019 – 2022)
Minsk, Belarus

Redesigned the Truck1 online marketplace from the ground up, modernizing the entire platform in the absence of a design system or documentation. Created a scalable design library, built mobile-first responsive layouts and introduced intuitive navigation and filtering. Supported localization in 32 languages, including complex RTL (right-to-left) scripts like Arabic. Used Hotjar analytics and direct sales team feedback to guide UX decisions and optimize for user behaviour.

Visual Designer

Freelance (2018 – 2019)
Minsk, Belarus

I started by working on visual design projects, creating materials for social media, websites and print – such as posters, business cards and banners. I also collaborated with printing houses and adapted visuals for different platforms, which helped me develop a strong sense for layout, colour and communication through design.

As I became more interested in UX/UI, I began working on concept-based projects to explore user-centered design and improve my skills through hands-on learning.

- Designed a wide range of **visual assets** for social media, websites, print materials and advertising campaigns.
- Collaborated with **printing houses** to prepare production-ready files and ensure high-quality outcomes.
- Created a **Smart Shower App** concept focused on sustainability, smart home integration and user personalization.
- Developed a **Coffee Pre-Order App** aimed at improving ordering efficiency and reducing wait times.
- Conducted informal **user research** and competitor analysis to identify user pain points and design opportunities.
- Built user flows, personas, wireframes and **high-fidelity mockups** with attention to accessibility and mobile-first design.
- Used these projects to practice the full **UX/UI design process** and grow confidence in presenting design solutions.

Volunteer Graphic Designer

Splitmetrics Inc. (2018)
Minsk, Belarus

I helped to redesign company documents to enhance visual clarity and ensure consistency across all materials. I also created posters that aligned with the company’s brand identity, helping to establish a more cohesive and professional visual presence. My skills grew, I became more focused on refining design elements to strengthen brand communication.

- Updated internal and external documents to reflect a **unified visual style**.
- Created branded posters to support **campaigns** and **internal communication**.
- Focused on layout, typography, and colour consistency to strengthen **brand recognition**.
- Ensured all designs followed the company’s **visual guidelines and tone**.
